pradyx.github.io/

github.com/PradyX

Results-driven Android Developer with strong experience in building scalable **mobile applications, AOSP-based custom OS, kernel development, and automation scripts**. Contributed to **multiple production projects** with extensive API integrations including **REST, SOAP, and Shopify GraphQL**, along with **Firebase, secure payment gateway implementations**, and **end-to-end Google Play Console publishing**. Proactive problem-solver focused on performance, stability, and continuous learning.

EXPERIENCE

Mobile Application Developer AppX

10/2024 - 01/2026

Achievements/Tasks

- Developed and enhanced core product features such as **test flow and solution pages, optimized test performance**, and **fixed production issues** in a live Android application, contributing to **improved user experience** and **product stability**.
- Worked with Firebase (**Crashlytics, Analytics, Realtime Database**) and **Meta Ads integration**, improving app stability, monitoring crashes, and supporting growth and monetization initiatives.

Android App Developer Sigma IT Softwares & Designers Pvt. Ltd.

07/2022 - 09/2024

Achievements/Tasks

- Delivered multiple production Android apps end-to-end, from requirement analysis to **Play Store release**. Integrated payment gateways, **Google Maps, push notifications**, and background services.
- Integrated Firebase services (**Crashlytics, Analytics, FCM, Realtime database/ firestore**) and conducted testing.

Android App Developer Techdock Pvt. Ltd.

02/2022 - 07/2022

Achievements/Tasks

- Worked on Android apps using **MVVM architecture** and integrated **Shopify GraphQL APIs** for data-driven features and backend communication.
- Implemented **Firebase services** such as **Authentication** and **Realtime Database** for user management and real-time data handling.
